**Information and Communication Technology (ICT)** in education uses informations and communications technology to support, enhance, and optimise the delivery of information. Worldwide research has shown that ICT can lead to an improved student learning and better teaching methods. It exists in multiple forms like audio, video, audio-visual, and texts. Besides it refers to the latest technologies and a repository of simple audio-visual aids such as slides, radio, cassette, and film. Introduction of ICT in education creates an easy-to-manage learning environment where the delivery of information is so much smoother and the learning easier.

Along the internet facility (Wi-Fi / LAN) in each classroom our college has seven classrooms with ICT facilities including one smart classroom. This smart classroom has one interactive white board where hand written notes can be saved for future reference. It has one white board for board work and two sound boxes to enhance audio system and also projector as visual aids. According to master time table teachers are taking classes through ICT tools on a regular basis which in turn help high student participation and engagement leading towards student centric learning system.
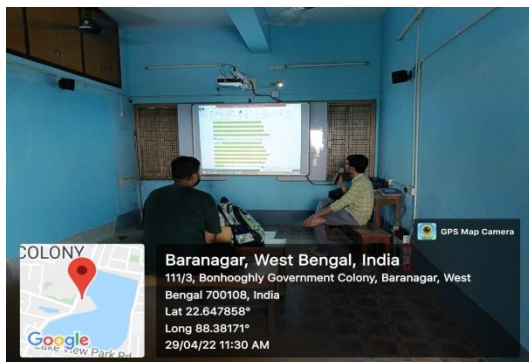

## ICT classes taken by departments

Department of English (Virtual Classroom)

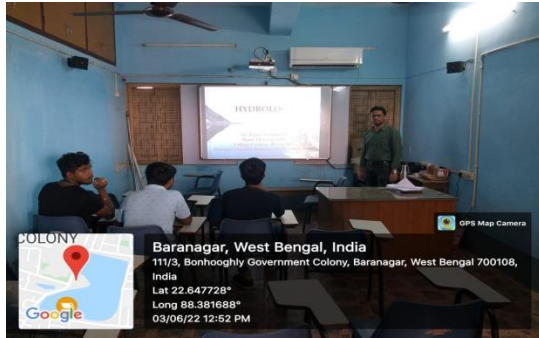

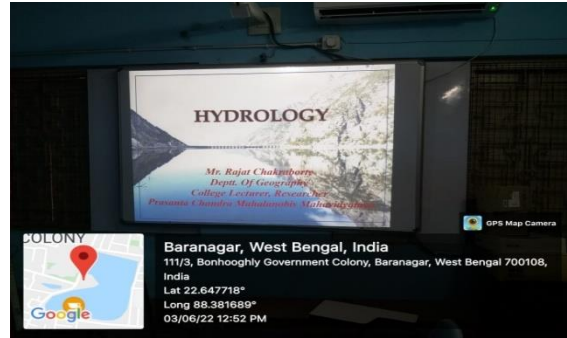

Department of Sociology

Department of Sociology

Department of Geography
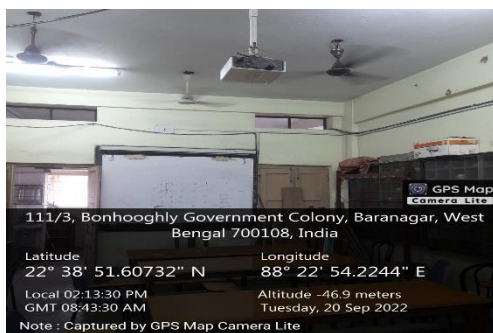

Department of Geography

Department of Geography

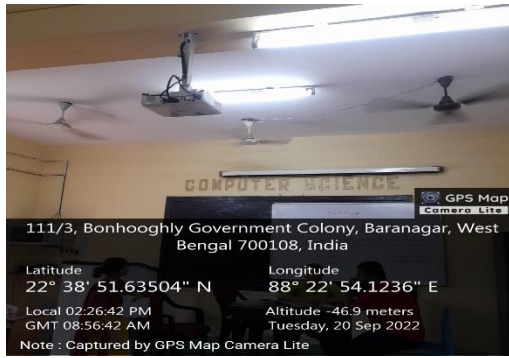

Department of Geography (Room No. 25)
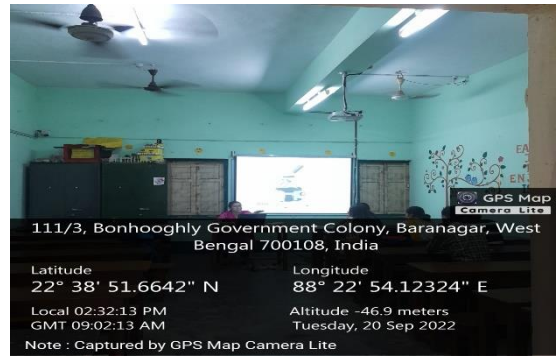

## Other Classrooms with ICT Facilities

**Room No. 21**

**Room No. 22**

**Room No. 9**

**Room No. 5**

**Room No. 39**

**Room No. 15**
