Computer Laboratory

The computer laboratory at Prasanta Chandra Mahalanobis Mahavidyalaya is outfitted with 31 computers and a printer, providing ample resources for students' academic endeavors. Most of these computers are equipped with dual operating systems, offering both Windows and Ubuntu options, thus catering to a wide range of user preferences. Essential software such as C/C++ compilers, JDK, Python, Oracle and others necessary for both honours and general courses are readily available. A LAN connection ensures seamless communication between all devices, complemented by high-speed internet access. The lab is enhanced with sound boxes and a projector, offering audio and visual aids to facilitate interactive learning experiences. Additionally, the laboratory premise is monitored by CCTV surveillance for added security.
